# BEARING

Bearings are important elements to machines to reduce friction between moving parts. International Bearings holds Exclusive & Authorized Distributorship of world-renowned brands such as NACHI, LUK/FAG/INA, TIMKEN, FYH, NMB, IJK, KOYO, and SAMICK, that caters to the requirement for the Automotive and Industrial sectors. Ensuring quality and reliability of products and services is our top priority and mission.

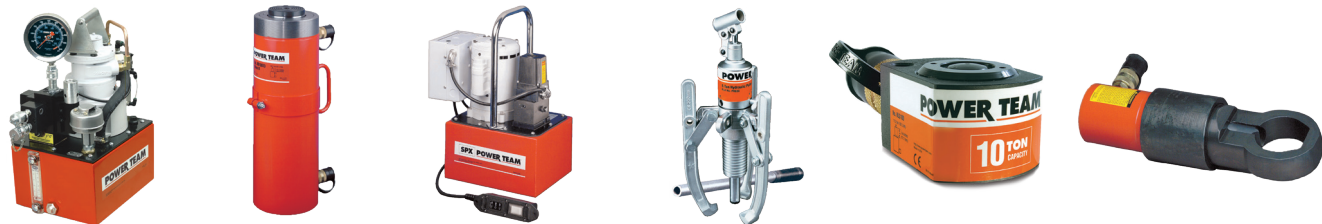

INTERNATIONAL BEARINGS PTE LTD | BEARING YOUR SOLUTIONS IN MIND

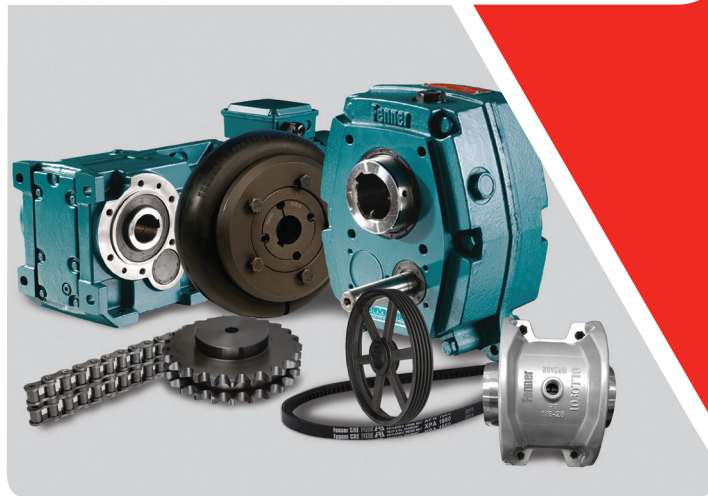

## HYDRAULICS TOOLS

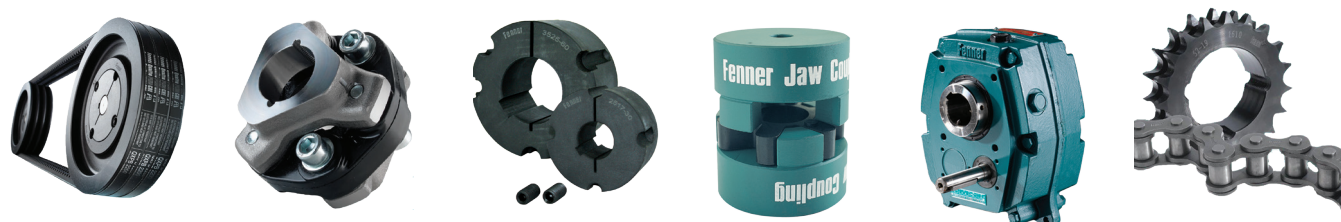

Hydraulic tools and equipment play a significant role in Engineering and are used in various areas. Power Team have been instrumental in the development of innovative high force hydraulic power products from inflatable jacks, hydraulic pumps, cylinders and valves to clamping components and accessories. Many of their products are known as the industry standard for rugged construction, reliability, and long service life.

## POWER TRANSMISSION

A leading name in the power transmission industry for more than 150 years, the Fenner brand is widely recognized as synonymous with exceptional products for everyday use to rugged and demanding industrial applications. Fenner started producing some of the finest hard-wearing transmission belting available in the market, a feature that remains a cornerstone of the brand today. Fenner provides a complete portfolio of premium products for applications across all industrial sectors. These include chains, high power CRE belts, couplings, taper bushes, sprockets, pulleys and Shaft Mounted Speed Reducer (SMSR).

## MAINTENANCE TOOLS

Preventive maintenance is an important part of facilities management. The goal of a successful preventive maintenance program is to establish consistent practices designed to improve the performance and safety of the equipment. International Bearings provides solutions to allow a range of customer applications to be transferred to the digital world and holistically optimized. The platform concepts combine mechatronic products, condition monitoring systems, and digital services to form application-specific 4.0 solution packages.

## LUBRICATIONS

Lubrication is important for reliable operations and long operating life of rolling bearings. Continuous lubrication ensures low maintenance cost. International Bearings carries a wide range of special lubricants for all bearing application. This includes automatic single-point and multi-point lubrication system under the brand name Simatec.
